About the sector

Accounting is concerned with the provision of information and its analysis for economic and management decisions. Through appropriate accounting procedures, businesses are better informed of their current and future financial positions, and are then able to take future actions regarding how to best utilise their economic resources.

Career paths in Accounting & Business Management includes:

- Management accounting
- Financial accounting
- Assurance services
- Management consulting
- Auditor
- Information system analyst
- Treasury and financial markets

"The inherent versatility of accounting has allowed me to work for leading organisations in the financial, commercial and public sectors. Contributing to high profile financial documents (including the NSW Budget) has provided me with tangible outputs for my work and has dramatically increased my understanding of the Australian economy. The broad industry exposure has allowed me to identify what interests me early in my career, ensuring that my career will be in an industry that I am passionate about."

William Mumford

Accounting & Business Management
Alumnus

"I know I have been given an incredible opportunity in the Co-op Program that will enrich my university life and help me establish and develop my future, personally and professionally. I've found that the Accounting program offers so many opportunities and is important to a diverse range of fields, and this program builds crucial business skills and develops business networks not just relating to the accounting profession but all areas of business and commerce."

Lucy Taylor

3rd Year Accounting & Business Management
Scholar

"The Co-op Program in Accounting & Business Management offers you a unique opportunity to gain the industry experience and networks, qualifications, leadership training and mentoring to prepare you for success as soon as you enter today's constantly evolving workplace."
