Careers in Information Systems & Technology

"There isn't a single business or industry on the planet that's not confronting a seismic shift in their environment caused by technology. It's empowering, disruptive, creative and productive, and at the very heart of so much social and economic change. Understanding it in a meaningful way is going to set the employees of tomorrow apart - technology is no longer just the domain of the IT Department. It's a critical success factor for everyone in the workforce."

"IT placements have put me in real business world scenarios that have challenged me to learn and grow as a business professional. You may think that sponsors are reluctant to place trust in university students, however I found that they were more than willing to give responsibility to Co-op scholars.. I have never regretted undertaking an initially challenging task, as it is from these experiences that I have gained the greatest knowledge and grown as a person and professional."

Nathaniel Lee

Business Information Systems
Alumnus

"I chose to study a Bachelor of Commerce with Information Systems as I've always been intrigued by the importance of technology in delivering successful business outcomes. We live in a digitalised age where raw data is now instantly captured and the ability to harness this fascinates me. Information systems are transforming society as we know it today and I want to be a part of this revolution"

Sonia Parulekar

Commerce (Information Systems)
Scholar

"The technology industry is such a fast paced and dynamic area which offers many career opportunities and challenges. Through the Co-op Program, students get to experience this first hand. The Program allows students to get their hands dirty and solve real world problems it takes students beyond just the theory they learn in the classroom."

Scott Farquhar, Co-founder Atlassian
Business Information Technology Co-op Alumnus, 1998
